

- 4.e. Barrett Paving  
State Fair Blvd., Syracuse, NY  
Shutdown in 1977.
- 4.f. Matthews Ave. Landfill  
Solvay, NY  
Operated until 1986.
- 4.g. Prestolite Site (Eltra Corp.)  
219 Lamson St., Syracuse, NY  
The facility, which is no longer owned by AlliedSignal, produced electric motors and ceased operation in late 1980's. The NYSDEC publication, Hazardous Waste Disposal Sites in New York, Volume 2, page D7-1 states that the "site has been investigated and no hazardous substances could be confirmed."
- 4.h. Jamesville Quarry  
Jamesville, NY  
This facility produced process limestone used in the production of chemicals at the Syracuse Works of AlliedSignal Inc. AlliedSignal Inc. or its predecessors operated the quarry from 1911 to 1986. The quarry was sold to General Crushed Stone in 1986. The facility is on Butternut Creek, which is in the Oneida Lake watershed.
- 4.i. New York Ordinance Works  
Baldwinsville, NY  
This plant produced ammonium picrate, an explosive. It operated for 13 months (1943-1944). Information indicates that the Semet Solvay Div. and the National Aniline and Chemical Corporation was involved with building and operating the plant for the U.S. Government. These companies were part of Allied Chemical & Dye Corp., now AlliedSignal Inc. The plant was on the Seneca River, which is in the Lake Ontario watershed.

Request for Information No. 5

5. Indicate the nature of the operation, for each facility identified in Question 4, above. If the operations changed, indicate the nature of those changes (including any name changes) and the dates the changes took place. In response to this question, please provide any information and documentation not presently provided in the Onondaga Lake RI/FS Site History Report or its latest update, dated April 3, 1996.
